OMAAR HEIGHTS

Genesis of Giriraj Builder was in the year 1984. Our Inception and our focus has been on quality at a economical cost to the customer. Over the years we have done many residential as well as commercial projects in the fast budding towns of palghar and boisar. From development of acres of barren land into value assets to contracts for hospitals and industrial sheds we have established ourselves in the core construction business delivering well on our promises. We have created a strong goodwill for ourselves in the area over these years and now our marketing takes place by word of mouth. We have created a reputation for ourselves that we are synonymous with quality ,trust and extravagant architectural designs and elevation.

Evolving over the years from building basic buildings to building better townships with amenities we have come a long way and continue to grow at a similar pace with times. With strong and firm ethics at our heart combined with the far sightedness of the founders we have been able to spot societal trends and adapt to the changing community needs.

Palghar The Hub Of Infrastructural Growth.
